Do Not Call Scrubbing

Did you know that all telemarketers and sellers are required to search the registry once every 31 days and delete the phone numbers of consumers who have newly registered? With possible fines reaching \$11,000 per violation, there is no reason to put your company at risk. We make it easier and more cost effective than ever to keep your list in compliance. All you have to do is provide us your valid SAN number and prospecting list and we do the rest. AmeriList will take your prospecting and client list and run them against the National Do Not Call registry, flagging or suppressing any names that appear, and returning a list to you that is clean and Do Not Call compliant.
