How our Data is Compiled

Our multi-sourced national business database is compiled by combining a wide range of sources which enables us to deliver an industry leading B2B Marketing solution. The information within our B2B list is collocated from multiple public and private sources including Yellow Pages, Government Data, White Pages, SEC Filings, Annual Reports, Business Magazines and Industry Newspapers. Not only do we cross reference a multitude of sources to ensure the most accurate data, we also telephone verify each business multiple times annually, this enables us to keep our records up-to-date. In addition we also secure data via a strategic partnership from several tier one business data compilers these files are then merged and purged to create a robust and accurate national file. Through our multisource compilation method and our continuous verification process we are able to identify more unique business information, yields more contacts names, and provider our clients with more reliable and deliverable business database than any single compiler in the industry.
